Election/Restrictions

Applicant's election without traverse of Group V, claim 17, is acknowledged.

Applicant has canceled claims 1-16 and introduced new claims 18-39. The introduction of these claims causes claim 17 to become a linking claim and the claims are now subject to further restriction in response to the newly added inventions linked by original claim 17.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 19-21, 23-28, and 30-39, drawn to a method of treating a disorder associated with inappropriate apoptosis via the modulation of CARD-7 expression or activity with a small molecule, classifiable in class 514, subclass 1.
- II. Claims 19-28 and 30-39, drawn to a method of treating a disorder associated with inappropriate apoptosis via the modulation of CARD-7 expression or activity with antisense or ribozymes, classified in class 514, subclass 44.
- III. Claims 19-21, 23-28, and 30-39, drawn to a method of treating a disorder associated with inappropriate apoptosis via the modulation of CARD-7 expression or activity with polypeptide, classified in class 514, subclass 2.

Application/Control Number: 09/931,071

Art Unit: 1635

Claims 19-21, 23-28 and 30-39 are generic to Groups I-III and will be examined limited to the invention elected.

Claims 17, 18 and 29 link(s) inventions I-III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 17, 18 and 29. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a methods of treatment using materially

Application/Control Number: 09/931,071

Art Unit: 1635

different compounds that have different modes of operation. Antisense oligonucleotides and ribozymes inhibit the expression of a protein from an RNA via a variety of possible antisense actions known in the art and a protein may be a dominant negative protein that inhibits the activity of a protein, for example. A small molecule may inhibit the activity of a particular protein by inhibiting the activity of a different protein responsible for activating a protein of interest, for example. The mode of activity of these different compounds are not interchangeable since the compounds made of different chemical constituents where each of the compounds have their own particular chemical and biological properties.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: diseases to be treated: immune disorder, inflammatory disorder, neurodegenertive disorder, amyotropic lateral sclerosis, and cerebral ischemia-induced disorder.

Application/Control Number: 09/931,071

Art Unit: 1635

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 17-24 and 29-35 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean R McGarry whose telephone number is (703)305-7028. The examiner can normally be reached on M-Th (6:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader can be reached on (703) 308-0447. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 872-9307 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
